

DOG MOUNTAIN SUMMER HIKE

The trail to Dog Mountain winds through beautiful forest on its way to an open viewpoint and offers a good introduction to the backcountry.

This is an excellent trail for novice hikers, families or groups of mixed fitness levels. Gently rolling terrain leads past a secluded lake to an open bluff with a stellar view of Vancouver and the lower mainland.

The "summit" of Dog Mountain is at nearly the same elevation as the parking lot. The rocky bluff has few trees and offers an excellent view, yet the trail has very little uphill. Rewarding and relaxing.

Estimated duration: **7.0 hours**
 Trail length (return): **5.5 km**
 Season: **June-October**
